Jaime García García

Project Manager · AI & Agentic Transformation in Banking

Madrid, Spain · linkedin.com/in/jaimegarciauk · jagarcig.com · jaime.garciagarcia.uk@gmail.com

I work on AI and agent-driven modernization projects for banks: from understanding legacy systems to building platforms where business teams and AI agents design together.

SELECTED CASES

Agentic Co-Design Studio · Tier-1 European bank · 2026
14 AI agents · 3 SDLC phases · 1 shared platform. From fragmented hand-offs to one traceable flow, with a human approving every step.
My role: Project Manager: product definition with the client, delivery planning and coordination of the team building the platform and its agents.

Agent-assisted mainframe modernization · Tier-1 European bank · 2025–2026
A complete application domain (4 online transactions and 13 batch processes) moved off COBOL in two quarters, cutting around 80 % of the mainframe transactional load for that domain.
My role: Senior Technical Lead: agent pipeline, review process and delivery with the bank's teams.

CAREER

NTT DATA · Madrid

Project Manager · AI & Agentic Transformation, Banking — Sept 2026 – Present

- I lead projects that bring AI agents into a bank's software lifecycle, from discovery and design to legacy modernization.
- Responsible for scope, planning, risks and stakeholder alignment across business, architecture and delivery teams.
- Featured project: Agentic Co-Design Studio.

Senior Technical Lead — Jul 2025 – Sept 2026

- I ran a full-stack team end to end: UX, frontend, backend, cloud and delivery with business stakeholders.
- Featured project: Agent-assisted mainframe modernization.

Technical Lead — Jul 2022 – Jul 2025

- I coordinated backend (Java microservices), frontend (React) and core-system teams on a European investment platform's client portal, staying hands-on to accelerate delivery.
- Featured project: Onboarding app modernization for an investment bank.

Software Engineer — Jul 2018 – Jul 2022

- Software development and maintenance: from refining functional and technical designs and building or changing backend and frontend code to deployments across all environments.

Santander UK · London

Personal Banker — Jan 2016 – Jun 2018

- I managed client portfolios, financial planning and weekly risk reviews, and was Digital Champion for mobile-app adoption.

Banco Santander · Madrid

Internship Trainee Nov 2014 – Dec 2015

- I co-organised the international digital-channels workshop for Santander Universities and managed virtual communities of 500+ members across 18 countries.

CAPABILITIES

Delivery & governance: Programme and project planning · Risk and dependency management · Stakeholder management · Agile/Scrum, Kanban, Lean · Jira

AI & agentic transformation: Agent workflow design · Human-in-the-loop processes · Spec-driven development · AI-assisted SDLC · Claude Code, GitHub Copilot · Azure AI Foundry

Banking: Legacy and core modernization · Mainframe to cloud · BIAN · Retail banking (front-line experience in the UK) · Risk awareness

Technical foundation: Java microservices · React and TypeScript · Azure · PostgreSQL · CI/CD

EDUCATION

BSc Economics · Universidad Carlos III de Madrid · 2009–2014

Master's in Marketing & Digital Communication · IMF Business School · 2015–2016

TEACHING

Instructor · AI PM Pro · The Hero Camp · 2026

LANGUAGES

Spanish (Native) · English (Full professional)
